

About Aspire Planning Our Approach to Financial Advice

The Aspire Planning way!

*Worrying about debt?
Thinking about your children's education?
Saving for your retirement?
Wondering how your friends and neighbours can afford overseas
holidays and new cars?*

When it comes to money, many of us are unsure if we are doing the right thing - for ourselves and our families.
Financial planning can appear overwhelming, impersonal or available only to the wealthy.
We challenge this view.

At Aspire, we help you identify your goals and create a plan to get you there.

Rather than receiving a 'robotic' investment plan, Aspire will provide you with a 'road map' that prioritises your goals and passions, while helping you navigate life's ever-changing stages.

We believe financial health is a vital component of well-being and happiness.
When your finances support the other aspects of your life, you are well on the way to a healthy, secure and balanced life.

Be empowered to Make It Happen!

The importance of Financial Security in a well balanced life

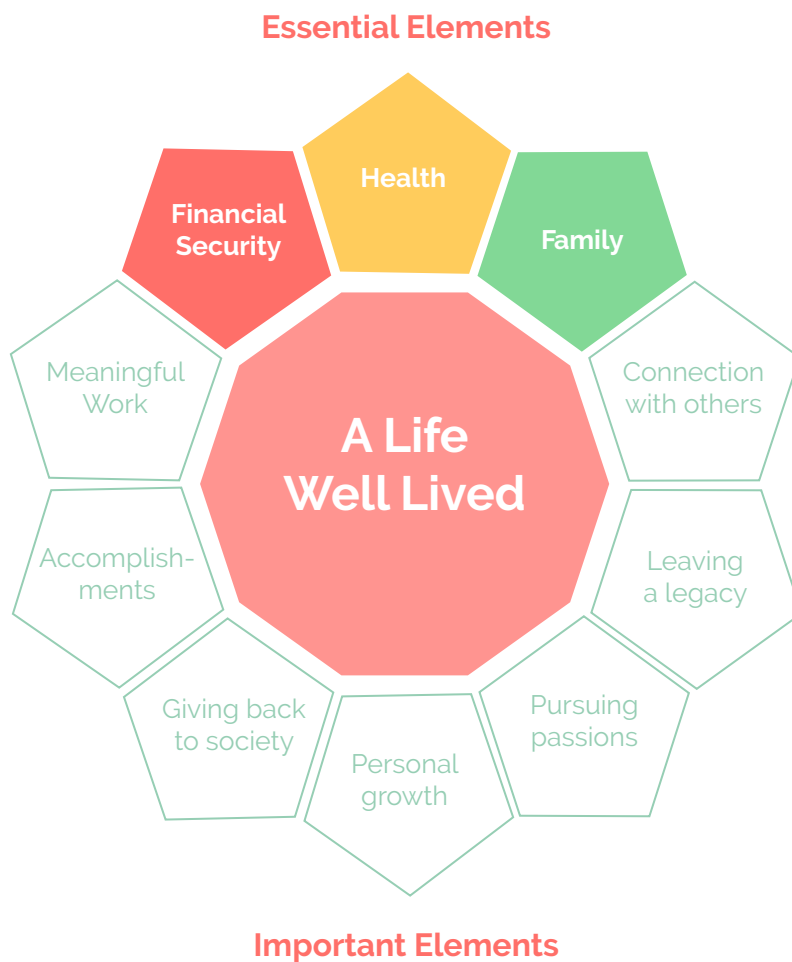

When we talk about a “Life Well Lived” several key elements are present.

While life experiences differ from person to person, three key elements are considered non-negotiable – Health, Family and Financial Security.

Creating Financial Security

At Aspire we work with you to create financial security, while also encouraging and supporting you to live a happy, healthy, and well-balanced life.

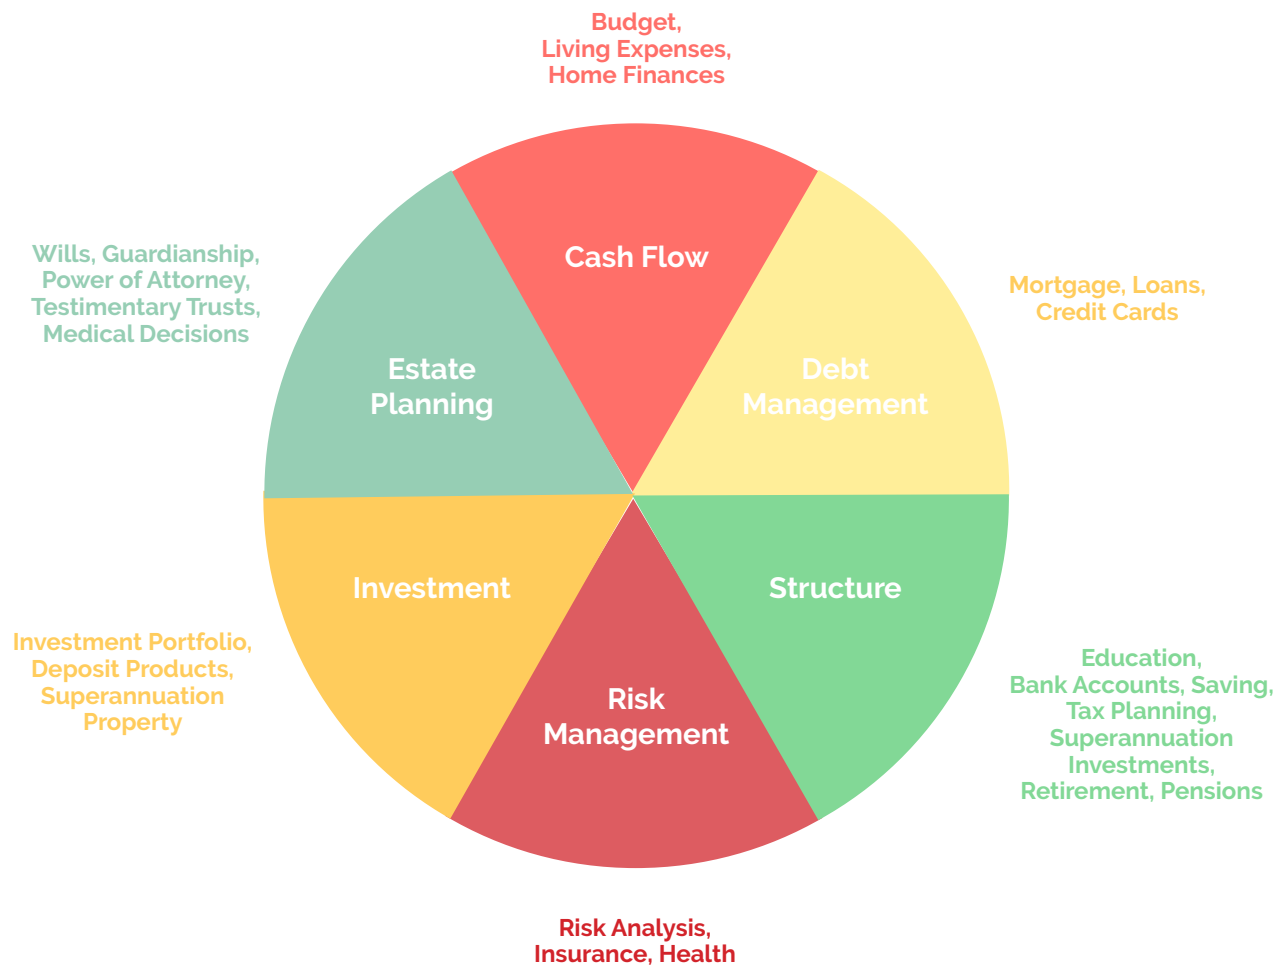

When you feel financially secure, your finances can be used to fuel the other important areas of your life.

Your Financial Security Wheel

Financial security means that you can financially support your aspirations, dreams and goals.

When measuring financial security, we look at six essential components that form the basis of a holistic plan.

Creating solid foundations in each of these areas, closely aligned to your goals, will put your plans on the right trajectory.

When we work together we assess your health in each area while establishing your priorities and hopes for the future.

You may be strong in some areas and weak in others, or you might need a boost across the board - we will listen, explain and advise you on the strategies to employ for achieving long term financial security. And the best bit? You are in control all the way!
